

Your Partner in Managing SBS

At AvevoRx, we recognize that living with short bowel syndrome (SBS) presents daily challenges. Our **AvevoRx Intestinal Rehabilitation** program is designed to empower patients and caregivers through education, personalized care, and expert support — with the goal of reducing dependency on parenteral nutrition (PN) and improving quality of life.

Program Goals

Expand access to tailored SBS education and support for patients and caregivers

Support a reduction in long-term reliance on parenteral nutrition

Advantages

12-Week Personalized Nutrition Program

Individualized to each patient's bowel anatomy for maximum impact

Fluid & Electrolyte Optimization

Guidance on oral rehydration solutions to support and maximize absorption

Medication Management Counseling

Strategies to reduce gastrointestinal output and enhance nutrient uptake

Laboratory Monitoring

Identify and address nutritional deficiencies linked to malabsorption

Customized Supplement Recommendations

Based on lab results and clinical needs

Collaborative Care Coordination

Ongoing communication with your prescribing physician to align treatment goals

Person-Centered Approach

Patient and family preferences shape the care journey

Resource Navigation & Support

Access to SBS-specific education, tools, and community resources

Why it Matters

Education & Support Is an Unmet Need

Patients and caregivers report a lack of consistent, accessible SBS education and support

(DiBaise, NCP 2023)

Less PN = Better Quality of Life

Quality of Life scores improve as PN dependence decreases

(Nordsten et al, JPEN 2021; Burden et al, Clin Nutr 2019)

Even One Night Off PN Makes a Difference

66% of patients say having one or more nights without PN and having a shorter PN infusion is 'very' or 'extremely' important

(Winkler et al, JPEN 2021)

Take the Next Step with AvevoRx Intestinal Rehabilitation

If you are living with SBS or are treating a patient with SBS, the AvevoRx Intestinal Rehabilitation program offers the tools, guidance, and support to make meaningful progress.

Let's redefine what's possible in SBS care — together!
